

T-O-P S-E-C-R-E-TDRAFT

JUN 28 1955

GLOBAL WAR PLAN FOR THE DD/I AREA

(As used in this paper, the term "intelligence production" means the production of National Intelligence as defined in NSCID 3, or any type of evaluated information which would be used in the interests of the national security. "Services of common concern" are services performed by the Central Intelligence Agency for the benefit of the entire intelligence community as envisaged by Section 102, paragraph d.(4) of the National Security Act of 1947 as amended.)

Concept of Organization

1. The peacetime organization of the Central Intelligence Agency would not necessarily fulfill the organizational requirements for the production of intelligence in wartime. Accordingly, the following fundamental organizational concepts will control the planning and production of intelligence in wartime.

a. The command and staff organization for the production of intelligence will be located at the CIA wartime headquarters in or near Washington, D. C.

b. All overseas operations necessary to the production of intelligence or support of clandestine operations will be under the command of a CIA Field Commander who is located in the field.

T-O-P S-E-C-R-E-T

T-O-P S-E-C-R-E-T

c. Other intelligence production in the field will be under the command of the theater commander. Though individual officers may be furnished by DD/I offices for such work, there will be no CIA administrative or substantive control of them.

1. General

a. Purpose: To define the major missions of CIA intelligence production mechanisms and the "services of common concern" provided by the Offices under the direction of the DD/I in the event of global war. This and subordinate plans become effective and will supersede any other plans now in effect on M-day or when directed by the DD/I.

b. Definitions:

Types of intelligence: see NSCID 3.

c. References:

(1) NSCID 3, approved 13 January 1948, assigns responsibility for the production of basic and national intelligence to the DCI.

(2) NSCID 15, approved 13 June 1951, and its derivative DCID 15/1, approved 14 September 1954, allocates primary production responsibilities for economic intelligence to CIA.

(3) NSCID 3, approved 13 January 1948, and its derivative DCID 3/4, approved 14 August 1952, assigns to CIA certain responsibilities for the production of scientific and technical intelligence.

T-O-P S-E-C-R-E-T

T-O-P S-E-C-R-E-T

(4) NSCID 6 assigns to the DCI responsibility for all Federal monitoring of foreign propaganda and press broadcasts for intelligence purposes and the dissemination of such intelligence information to authorized persons.

(5) NSCID 7 assigns to CIA the responsibility for the collection of foreign positive intelligence [REDACTED]

25X1A [REDACTED]

25X1A

(6) NSCID 8 directs CIA to maintain files of biographic data on foreign scientific and technological personalities.

(7) NSCID 16 states that the DCI shall insure the coordination of the procurement, exploitation and referencing of foreign language publications for intelligence purposes.

(8) The DDI is delegated the authority of the DCI for the execution of the responsibilities cited in paragraphs (1) through (7) above.

(9) Other National Policy Papers: The National Security Council will levy specific intelligence production requirements on CIA and the IAC. The nature and volume of these requirements cannot be determined in advance.

(10) Command Relationships between CIA and the Armed Forces in Theaters of War where American Forces are Engaged: Constitutes agreements between the Department of Defense and CIA concerning the activities and military command relationships of US military forces and CIA elements in producing evaluated intelligence at the Joint Staff level.

T-O-P S-E-C-R-E-T

d. Situation: The analysis of the situation and the basis for assessment of probable developments is contained in pertinent military plans and estimates and the rules for the production of national intelligence and will not be repeated here.

e. Assumptions:

- (1) That there would be little or no warning prior to the actual initiation of hostilities.
- (2) That atomic weapons will be employed at the outset of the war, and that headquarters operation may be disrupted.
- (3) That the role of the NSC as a strategic planning body will be emphasized, and that the basic NIE mechanism will be used to support the NSC.
- (4) That the DD/I will continue to perform "services of common concern" for the intelligence community.

2. Mission:

a. General Mission: The DD/I will plan for and

- (1) produce such intelligence as is required for
 - (a) national policy determination,
 - (b) strategic war planning, and
 - (c) tactical intelligence and target analysis as required by the military.
- (2) provide such intelligence support to the conduct of exceptional operations and non-theater operations as is necessary.
- (3) conduct such field exploitation of intelligence targets as is necessary to the production of intelligence.

T-O-P S-E-C-R-E-T

(4) provide such services of common concern as are now furnished to the intelligence community as well as any new services as may be directed from time to time.

b. Strategic Concept:

(1) During the initial phases of the war, intelligence production will be concentrated on evaluations of the current situation.

(2) Following this phase, intelligence will be produced for any requirement levied by competent authority on any area of the world.

c. General Phases of Accomplishment:

(1) Preparatory: Pre M-day

(a) The production of intelligence and associated support functions will be carried on as prescribed in appropriate regulations and directives.

(b) Preparation of the mobilization plan: Each DD/I Office will prepare a mobilization plan in detail for the conversion to wartime application of personnel and equipment developed or accumulated.

(c) Techniques and procedures for the production of intelligence and conduct of "common concern" support functions under wartime conditions will be developed and tested.

(d) Systematic training of personnel to discharge intelligence production and support function responsibilities under wartime conditions.

T-O-P S-E-C-R-E-T

(2) Initial Maritime Operations:

- (a) Execute evacuation and redeployment plans if necessary.
- (b) Call in for immediate duty civilian reservists (See Tab B) and/or graduate reservists (See Tab C) as needed.

(c) Implement the DD/I plan for conversion of military reservists from civilian to military status (See Tab D).

(d) Make intelligence evaluations of the current situation as required.

(e) Provide such "common concern" support functions as required.

(3) Build-up Post D-Day:

- (a) Continuation of intelligence production on current situations.
- (b) Implement Office plans for strategic intelligence production.
- (c) Provide expanded service in the "common concern" functions.
 - (i) Expand training of intelligence officers to replace losses by casualty or reassignment.

3. Tasks

- a. The AD/NE, AD/RR, AD/SI, and AD/CI will plan for and produce such intelligence as is required.

T-O-P S-E-C-R-E-T

T-C-P S-E-C-R-E-T

b. The AD/CD and AD/O will plan for and provide such support as may be required by the intelligence producing offices and the clandestine services as well as provide the "common concern" support functions for the intelligence community.

c. Based on this plan and the responsibilities levied on each Office in Tab A, each Assistant Director will submit an Office War Plan to the DD/I for approval by 15 October 1955. (See paragraph 6 below.)

d. Administration and Logistics

a. Headquarters administration and logistics will be provided by the DD/S and the Office administrative staffs with guidance from the Assistant to the DD/I (Administration).

b. Administration and logistics for DD/I personnel assigned to theater headquarters will be in accord with agreements between the Department of Defense and CIA.

5. Command and Communications

a. Command Relationships

- (1) At headquarters each Office will report to the DD/I.
- (2) For overseas components, command relationships will be in accord with agreements between the Department of Defense and CIA.

T-O-P S-E-C-R-E-T

25X1D

6. Implementation

a. Preparation, approval and description of annexes.

(1) Preparation of Annexes (See Tab A)

- (a) Annex A - National Intelligence
- (b) Annex B - Economic Intelligence
- (c) Annex C - Geographic Intelligence
- (d) Annex D - Scientific and Technical Intelligence
- (e) Annex E - Current Intelligence
- (f) Annex F - Intelligence (Production) Support

(2) Approval of Annexes: The DD/I will approve annexes

for the purpose of inclusion in this plan subject to concurrence of the DD/P for those parts of the annexes that pertain to field operations.

b. Upon receipt of the Plan all DD/I Offices will undertake the necessary preparatory activities and planning to support the global war mission of the DD/I (See paragraph 2 - Mission). Even if firm requirements for the production of intelligence in wartime may be lacking, preparatory action will be undertaken as fully as possible on the basis of the best available information.

ROBERT AMORY, JR.
Deputy Director/Intelligence

DRAFT Approved For Release 2001/08/27 : CIA-RDP61S00750A00060009006458 A

ANNEXES

A - National Intelligence: To be prepared by AD/NE in collaboration

with AD/RR for the NIS portion.

B - Economic Intelligence: To be prepared by AD/RR. This annex

25X1B

[REDACTED]

25X1B

C - Geographic Intelligence: To be prepared by AD/RR.

D - Scientific and Technical Intelligence: To be prepared by AD/SI
in collaboration with AD/RR and AD/CI as necessary.

E - Current Intelligence: To be prepared by AD/CI in collaboration
with AD/NE, AD/RR, and AD/SI.

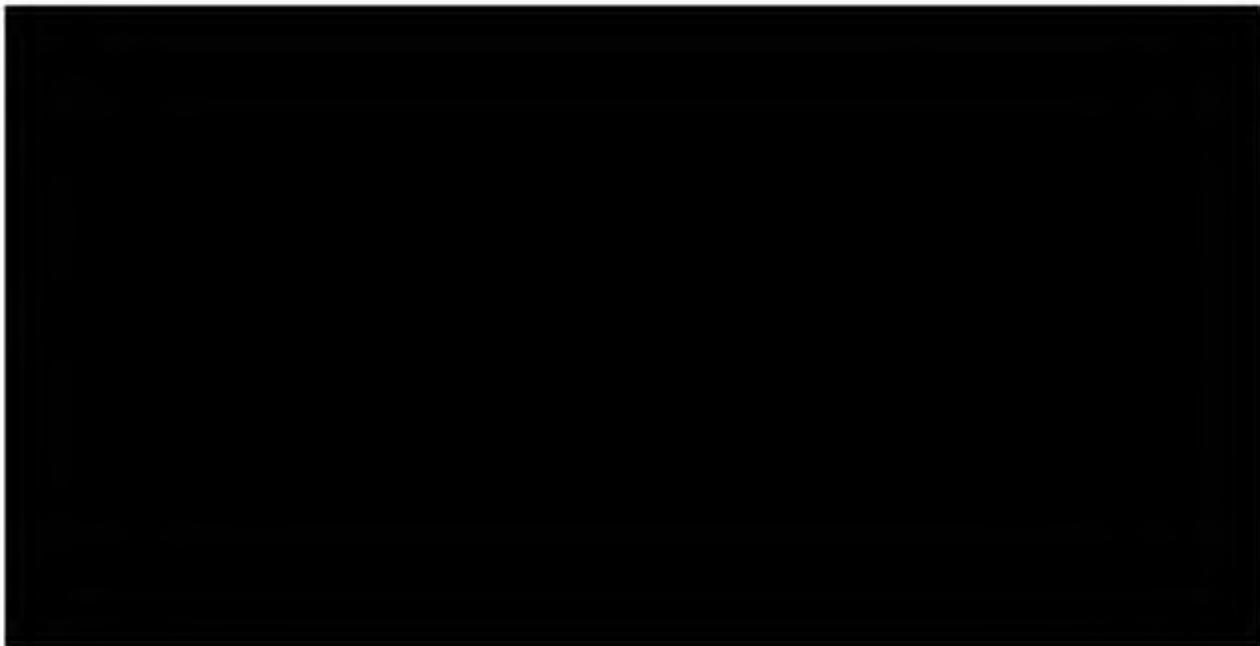

F - Intelligence Support: To be prepared by AD/CD in collaboration
with AD/O. Full cognizance will be taken of all existing
directives (e.g. ASDIC) affecting the handling of foreign
language documents in wartime.

TAB C

THE GRADUATE RESERVE

The graduate reserve will be made up of people who have left CIA under conditions conducive to reemployment.

Up-to-date security clearances will be maintained on the graduate reserve. Detailed planning for the graduate reserve will be the primary responsibility of the Director of Personnel in close cooperation with the Offices.

T-O-P S-E-C-R-E-T

T-O-P S-E-C-R-E-T

TAB D

MILITARY RESERVE

1. Assumption

That a basic CIA policy decision will be made to the effect that all military reservists will be called to active duty on M-day and will report to the DCI for duty.

2. Discussion

a. It appears that there are possible alternatives for the utilization of military reservists called to active duty and assigned to CIA:

- (1) to be assigned to headquarters DD/I units
- (2) to be assigned to DD/P (overseas and/or headquarters)
- (3) to be released to their respective arm and service.

b. In order to properly staff a headquarters DD/I complement of military personnel it will be necessary to establish which positions at the DD/I area would best be filled by military types. The responsibility for this determination must be placed on the respective Assistant Directors.

c. Before release of any military reservists called to active duty to the DD/P or the military establishment it will be necessary to provide alternates (civilians) to the presently assigned positions so released.
